1989 BLM Facts & Figures for Utah

The Library of the
DEC 6 1990
University of Illinois
at Urbana-Champaign

PREFACE

The Utah State Office of the Bureau of Land Management is pleased to provide a compilation of information about the management of public lands and resources under its jurisdiction in Utah. This is the latest in a series of such reports dating to 1963.

We are often asked for this type of information and hope you will find this booklet helpful. Much of the statistical information in Facts and Figures is provided as data, without interpretation or explanation. In case there is any question as to the meaning of the tables and charts, please feel free to contact one of our offices.

BLM is an agency of the U.S. Department of the Interior. It was organized in 1946 by consolidation of the General Land Office and the Grazing Service. The BLM administers on behalf of all United States citizens some 22 million acres of land in the State of Utah, or approximately 42 percent of the total land area in the State.

The BLM is responsible for the balanced management of the Public Lands and resources and their various values so that they are considered in a combination that will best serve the needs of the American people. Management is based upon the principles of multiple-use and sustained yield; a combination of uses that takes into account the long-term needs of future generations for renewable and non-renewable resources. These resources include recreation, range, timber, minerals, watershed, fish and wildlife, wilderness and natural, scenic, scientific and cultural values.

TABLE OF CONTENTS

GENERAL

Managers, Office Addresses 1
Organization Chart 3
BLM Employment in Utah 4
Volunteers 5

LANDS

Land Ownership in Utah 9
Percentage of County Areas Administered by BLM 10
Cadastral Survey Accomplishments 11
Acres of Public Lands Patented, 1956-1989, by Type of Land Transfers . . 12
Land Grants to State of Utah 13
Utah in Lieu Selections Approved Since 1950. 14
Areas of Critical Environmental Concern (ACECs). 15
Resource Management Plans/Environmental Impact Statements Schedule . . . 18
Planning and Grazing EIS Progress (map). 19

FINANCE

Appropriated Funds 23
Fiscal Year 1989 Appropriated Funds (chart). 24
BLM Receipts in Utah, by Category. 25
Payments in Utah Counties. 26

RECREATION

Recreation Visits to BLM-Administered Lands in Utah. 29
BLM-Developed Recreation Sites in Utah 30
Recreation Fees Collected 37
Utah Wilderness Review 38

WILDLIFE

Program Explanation. 41
Estimated Number of Big Game Animals Using BLM-Administered Land 43
Important Game and Waterfowl Habitat on BLM-Administered Land. 43
Habitat Improvements on BLM-Administered Lands 44
Fisheries on BLM-Administered Lands. 46

GRAZING

Beef Cattle and Sheep on Utah Farms. 49
Grazing Management and Range Improvement Practices 50
Permitted Livestock and Number of Operators. 52
Permitted Livestock and Number of Operators by BLM District. 53
Wild Free-Roaming Horses and Burros. 54

FORESTRY

Vegetative Product Sales 57
Wildland Fires Suppressed on BLM-Administered Lands. 58
Wildland Fires Suppressed on BLM-Administered Lands (graph). 61

MINERALS

Mineral Estate, by County. 65
Mineral Operations on BLM-Administered Lands 66
Mineral Revenues 66
Production of Oil, Natural Gas, and Coal (graph) 67
Mineral Leases and Permits 68
Mining Claims Recorded 69
Withdrawals and Segregations from Mineral Development. 70
Temporary Segregation from Mineral Development 71

TOTAL	519,945.85

State's remaining entitlement as of December 31, 1987 - 78,586.36

By the Utah Statehood Act of July 16, 1894, the U.S. Congress provided that Utah would receive sections 2, 16, 32, and 36 of each township in the State to support the public schools. This totaled 5,844,196 acres. However, the land had to be surveyed before title could be passed. In some cases, withdrawals were made by the Federal Government for defense or other purposes before the lands were surveyed. In those cases, the State was allowed the right to select other lands "in lieu" of those lands for which title was not vested. Later, in 1958, Utah Senator Arthor V. Watkins was instrumental in getting a bill through Congress that allowed the State to select in lieu mineral lands if the lands lost were mineral in character.

* 10,479.20 acres of this total not deleted from entitlement since selected land and offered land are same lands.

AREAS OF CRITICAL ENVIRONMENTAL CONCERN

ACECs

Designated ACECs

District	Name	Size(acres)
Cedar City	Water/Indian Canyon	260
Moab	----------	0

1/ Mineral receipts include those collected by the BLM and Mineral Management Service for bonus bids, rents and royalties from all mineral leasing authorities.

2/ Includes significant payment of back coal royalty.

3/ Includes $140,682 from Mining Claims in the Locatable Minerals Program.

PAYMENTS TO UTAH COUNTIES IN LIEU OF TAXES

The Payments in Lieu of Taxes Act provides for payments to local units of government containing certain federally-owned lands, to assist in financing operations of local government normally supported by taxes which are not collected from the federally-owned lands. These PILT payments supplement other Federal land receipt sharing payments local governments may be receiving. Payments under the Act may be used by the counties for any governmental purpose.

The recreation fees collected from special recreation use permits and campground user fees for 1989 were $256,900.

RECREATION 2000

The public lands administered by the Bureau of Land Management provide unique outdoor recreation opportunities for the American people. BLM's role in providing outdoor recreation opportunities can be traced to the nature and diversity of resources found on public lands: it is these resources that will continue to draw the outdoor enthusiast.

Recreation is an important part of the economic base for this country and the State of Utah. The 1986 report of the President's Commission on the American Outdoors identified the importance of outdoor recreation to our national economy and to the health and well-being of our bodies and minds.

BLM's policy is to ensure the continued availability of public lands for a diversity of resource-dependent outdoor recreation opportunities while managing these lands as a national resource within the principles of balanced multiple use.

BLM intends to improve service by providing increased opportunities for public awareness and appreciation of the recreational resources. The public lands managed by BLM will continue to provide a wide variety of quality outdoor recreation experiences for both present and future generations.

OPPORTUNITIES FOR VOLUNTEERS

Recreation opportunities in Utah open to volunteers are:

- camp hosts at Red Cliffs Campground, Calf Creek Campground, Star Spring Campground, Oasis Campground, White Sand Campground, Windwhistle Campground, and Hatch Point Campground;
- hosts at Little Sahara Recreation Area Visitor Center, Cleveland Lloyd Dinosaur Quarry Visitor Center, and the John Jarvie Ranch Historic Area;
- hosts on segments of the recreational rivers, particularly the Colorado and Green Rivers;
- hosts in one of the designated OHV riding areas;
- help to locate and construct new trails and maintain or improve existing trails;
- provide assistance in a wide variety of construction and/or maintenance activities.

UTAH WILDERNESS REVIEW

	Acreage Inventoried	Units	Percent of BLM-Administered Land in Utah
Statewide (starting in 1978)	20,064,748	871	91%
Initial Inventory (as a result of eliminating areas with "roads," "imprints of man" and other criteria)	5,417,510	169	25%
Intensive Inventory - identified Wilderness Study Areas (included in FEIS issued in 1990)	3,235,834	83	15%
BLM "Proposed Action" in FEIS	1,975,219	66	9%

In addition, approximately 22,600 acres administered by BLM in Utah were designated wilderness as part of the 1985 Wilderness Act for Arizona. This act included approximately 20,000 acres in Paria Canyon in Utah and approximately 2,600 acres in the Beaver Dam Mountains in Utah.

Remaining Steps:

Final EIS with modified proposed action to be issued in 1990.

Submission of BLM recommendations (through Secretary of the Interior) to the President of the United States must be done before October, 1991.

The President has two years after he receives the recommendations to forward them to Congress. There is no deadline or time-table for Congress to act; only Congress can designate areas as part of the National Wilderness Preservation System.

Wildlife

WILDLIFE AND PLANTS

The Federal Land Policy and Management Act (FLMPA) recognized wildlife as one of the principal uses of the public lands. It also further increased BLM's authority and responsibility to manage, protect, and enhance wildlife and fishery resources. Since the passage of the Sikes Act in 1974 and FLMPA in 1976, BLM has increased its effort to inventory, plan for, and implement on-the-ground management and development of terrestrial and aquatic wildlife habitat. Wildlife staff work closely with other BLM program staffs to develop and implement land use planning strategies, to identify protective provision in leases, licenses, and permits, and to develop and implement management plans that provide intensive management for key wildlife habitat areas. BLM biologists are also incorporating wildlife provisions in plans for livestock grazing, mineral development, and forest management.

Endangered species legislation passed in the late 1960s and 1970s added a new dimension to management of the Nation's wildlife by providing a mandate to conserve and manage ecosystems essential to fauna and flora in danger of extinction. It clearly directed federal agencies to protect the continued existence of such threatened and endangered species. Fifteen federally listed threatened and endangered plants and fourteen animal species occur in Utah. Nearly all of these species are located on BLM-administered public lands. A complete inventory of the location and habitat of these species is considered a priority for BLM in Utah. BLM is working closely with other agencies, conservation groups and universities to obtain the necessary information on these important species.

BLM works in partnership with the Utah Division of Wildlife Resources (DWR) to carry out its mission of managing fish and wildlife habitats on the public lands and to ensure that wildlife needs are considered in all land use planning and decision making. The Sikes Act of 1974 added impetus to such cooperative planning and management with State wildlife agencies by authorizing conservation and rehabilitation programs on public lands and directing the Secretary of the Interior to implement cooperative programs for fish and wildlife with State fish and game agencies.

BLM has executed memoranda of understanding and numerous cooperative agreements with the Utah DWR. The State is responsible for wildlife population management while BLM is responsible for wildlife habitat management on public lands. The interdependence of habitat and population management makes the close coordination between BLM and the Utah DWR a critical element in BLM's wildlife management program. There is a direct relationship between funding for wildlife habitat management and the effectiveness of State efforts to improve and manage wildlife populations.

Public demand for fish and wildlife resources continues to increase. As reported by Utah, since 1971-72 public demand for game species has exceeded the supply. Nonconsumptive uses in the form of birdwatching, wildlife photography, nature walks, etc., are becoming more and more popular. The 1985 Fish and Wildlife Service National Survey of Fishing and Hunting shows that 959,400 people hunted and fished and another 906,400 residents enjoyed wildlife-related recreation. Estimated wildlife-related expenditures were $500,000,000.

The supply of fish and wildlife resources is dependent on the quantity and quality of habitat and the capability of the habitat to sustain and maintain a fish and wildlife resource. Public lands administered by the BLM in Utah comprise approximately 43 percent of the land area. Therefore, the opportunities for BLM to carry out conservation programs and to satisfy public demand is exceptionally high.

The BLM in Utah has prepared a "Utah Fish and Wildlife 2000" plan to direct the expenditure of limited funds and workmonths. The plan will be printed by the end of 1990. A concerted effort has been made by the BLM and DWR to provide for the protection and enhancement of fish and wildlife habitat on public lands through the development and implementation of habitat management plans. On the following pages is a summary of the number of plans and the kinds of habitat improvements accomplished during 1989.

Drought conditions that have existed since the summer of 1987 have been responsible for reductions in some wildlife species, especially deer. Desert bighorn sheep have experienced a serious die off in one sheep unit.

ESTIMATED NUMBERS OF BIG GAME ANIMALS USING PUBLIC LANDS ADMINISTERED BY BLM

	1987	1988	1989
Deer	210,000	220,000	190,000
Antelope	9,000	9,500	12,500
Elk	11,000	11,400	13,600
Moose	275	280	150
Desert Bighorn Sheep	1,500	1,500	1,005
Rocky Mountain Bighorn Sheep	250	260	270
Buffalo	300	300	300

ESTIMATED ACRES OF IMPORTANT GAME AND WATERFOWL HABITAT ON PUBLIC LANDS ADMINISTERED BY BLM, 1988

District	Big Game	Small Game	Waterfowl
Salt Lake	2,700,00	3,000,000	33,700
Cedar City	5,000,000	5,200,000	9,000
Richfield	6,000,000	6,600,000	10,300
Moab	4,700,000	5,420,000	28,000
Vernal	1,050,000	1,300,000	36,000
TOTALS	19,450,000	21,520,000	117,000

SUMMARY OF HABITAT IMPROVEMENTS COMPLETED ON PUBLIC LANDS ADMINISTERED BY BLM - DURING 1989

Activity	Unit of Work	Total Units Cumulative	Total Units Completed 1989
1. Terrestrial			
a. Fences			
(1) exclosures/enclosures	number/acres	72/3,420.2	7
(2) modifications	number/acres	126/380	4
(3) protective	miles/acres	48/7100	0
b. Vegetation manipulation			
(1) chaining	acres	25,475	1,000
(2) prescribed burning	acres	16,200	1,900
(3) seeding/planting	acres	22,445	1,000
(4) chemicals		400	0
c. Water facilities	number	360	26
d. Dens and nest structures	number	180	21
e. Perch and roost structures	number	50	1
f. Other - wildlife escape ramps, etc.	number	178	0
2. Aquatic			
a. Streams

1970	662,000	156,897	978,000	851,019
1975	748,000	151,989	660,000	572,684
1980	690,000	125,355	595,000	382,711
1981	673,000	129,339	620,000	390,656
1982	745,000	145,126	610,000	409,603
1983	789,000	143,939	560,000	434,120
1984	742,000	146,664	540,000	427,205
1985	677,000	150,050	490,000	426,434
1986	662,000	153,964	460,000	456,902
1987	660,000	163,748	440,000	402,540
1988	652,000	242,005[5]	460,000	358,984[5]
1989	613,000	[4]	480,000	[4]

1/ Annual livestock report from Utah Agriculture Statistics, 1988, Reporting Service.

2/ Animals grazing on BLM-administered lands are permitted numbers during the grazing fee year which is between March 1 each year and the following February 28th.

3/ Beef cattle numbers are estimates based on total cattle in Utah including calves under 500 lbs., feeders, and replacements.

4/ Not available by press time.

5/ Numbers of livestock on BLM-administered lands may include some double counting of livestock.

GRAZING MANAGEMENT AND RANGE IMPROVEMENT PRACTICES

The following represents best current estimate of opportunities to reach the grazing potential on public lands in Utah. As the Bureau's integrated planning system is implemented, these judgments are subject to revision.

A. All allotments are divided into three management categories as follows:

M	I	C	Unalloted	Total
343	600	536	33	1,512

Under the M Category allotments are managed to maintain the current satisfactory range condition. I Category allotments are managed to improve existing conditions. C Category allotments are managed under a custodial concept whereby resource potential is low, no use conflicts exist or opportunities for a positive economic return from public investments do not exist, and present management is accomplishing the desired results.

B. Accomplishments

	FY 1987	FY 1988	FY 1989
Land Treatment includes plowing, juniper chaining seeding, spraying, prescribed burns (acres)	5,142	7,674	7,910
Water Developments			
Pipelines (miles)	25	43	22
Reservoirs (each)	47	9	50
Springs (each)	6	3	8
Water Catchments (each)	2	9	8
Wells (each)	0	0	1
Fencing (miles)	72	78	30
Cattleguards (each)	8	10	6

Total to Date:

Land Treatment	650,213 acres
Water Developments	3,430 each
Fencing	8,015 miles

C. Allotment Management Plans (AMPs)

AMPs implemented through 1989 326

D. Estimated increased Grazing Capacity

Estimated present grazing capacity of BLM grazing land:

Domestic livestock	1,331,000 AUMs
Wildlife	251,528 AUMs
TOTAL	1,665,000 AUMs

Estimated total capacity potentially available through intensive management and completion of supportive measures (fences, land treatment, etc.) 2,000,000 AUMs

E. Program Level Since 1966

Fiscal Year	Soil & Water Funds	Range Improv. Funds	Range Mgmt. Funds
1966	$ 1,512,900	$ 149,800	$ 446,800
1967	1,345,100	155,900	402,300
1968	1,229,700	137,400	383,500
1969	1,236,000	130,000	423,000
1970	929,800	165,500	370,300

WITHDRAWALS/SEGREGATIONS
FROM MINERAL DEVELOPMENT

UTAH

The attached information provides a general indication of the withdrawals/segregations of Federal land from mineral development in Utah. The statistics were derived without indepth study and thus may not be completely accurate. A minimum amount of double counting may be in the statistics. Mineral leases exist on much of the temporarily segregated area.

Formal Withdrawals from Mineral Development 1/

	Acres	
NPS 2/	1,921,455	(Segregated from mining and mineral leasing)
Defense Dept.	1,836,691	(Segregated from mining and mineral leasing)
USFS 3/	218,581	(Segregated from mining, leasing partially)
FWLS 4/	66,000	(Segregated from mining, leasing partially)
BOR 5/	645,131	(Segregated from mining only)
BLM (Primitive)	98,512	(Segregated from mining only)
Total	4,786,370 acres	

1/ Does not include 2,757.310 acres of Federal oil shale land withdrawn from the General Mining Law by Executive Order (EO 5327) of 1930 and further interpreted by Public Land Order (PLO) 4522 of 1968. Withdrawal was for the purpose of preventing further clouding of oil shale title to allow leasing.

2/ National Park Service

3/ U.S. Forest Service

4/ Fish and Wildlife Service

5/ Bureau of Reclamation

TEMPORARY SEGREGATION FROM MINERAL DEVELOPMENT

Glen Canyon National Recreation Area 1/	1,180,000
U.S. Forest Service Roadless Wilderness Study 2/	780,000
State Exchange Applications 3/	95,723
TOTAL	2,055,723

1/ Under wilderness study and master plan development. May be partially opened to mineral leasing and mining location.

2/ Mineral leasing suspended pending roadless area/wilderness evaluation study and preparation of EIS before leasing is resumed.

3/ Pending classification considerations by BLM.
